

LHZ Solar PV Control powered by immerSun

The immerSun Solar PV - Intelligent Controller
LHZ Electric Combination Radiators are photovoltaic usable.

The immerSun Solar Unit is an electronic control unit which measures the existing solar power and regulates the energy distribution. Your home is powered intelligently according to your needs for your electric heating and domestic hot water.

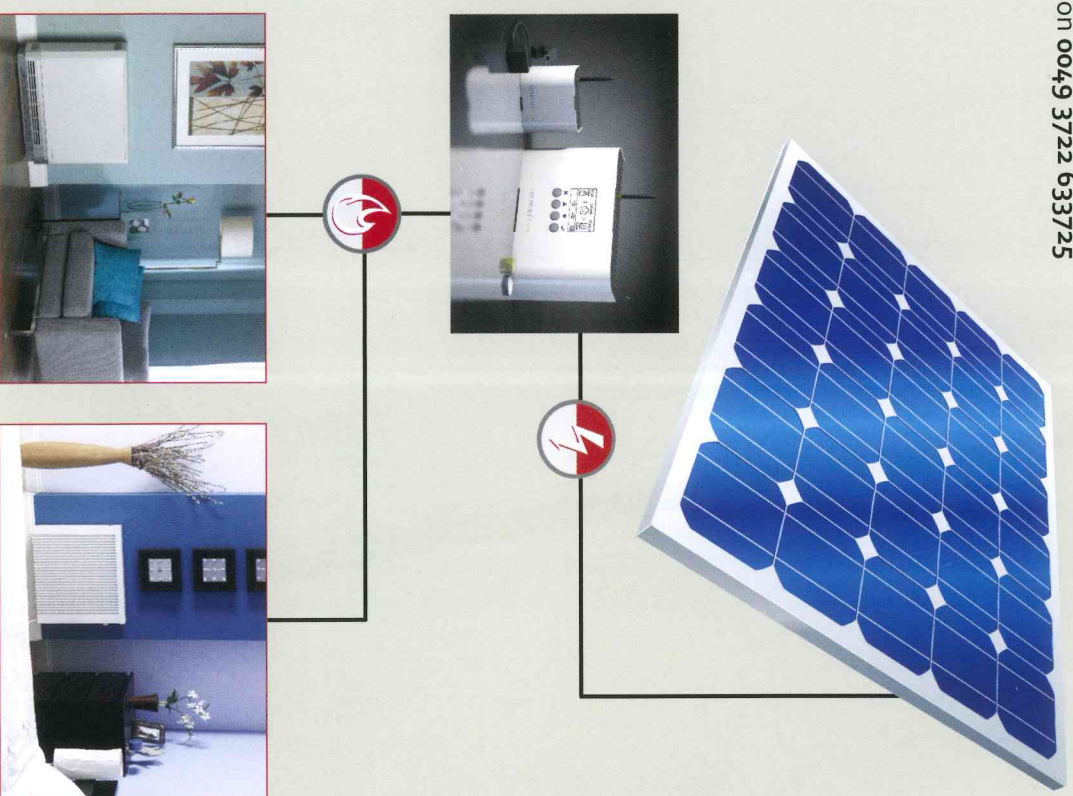

- Heating with power generated by your green energy
- Heaters can be individually controlled
- Send your generated Solar PV energy to the rooms that require the most heat
- Green energy savings for your hot water needs
- No CO₂-emissions
- Sustainable for the future
- Flexible and easy to use
- The immerSun Solar Unit makes you more self-sufficient and environmentally friendly

Cleaner and Warmer Future for Your Home

LHZ Radiators and the immerSun will provide controllable heat and a greener future.

For further information contact our specialists on **0049 3722 633725**

LHZ Radiators and the immerSun can be retrofitted to existing photovoltaic systems!
